DETAILED ACTION

A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 06/19/2006 has been entered.

Claims 202-215 are added. Claims 31,34,114,115,132-154,189-215 are pending.

Upon consideration of the pending claims, and in view of submission of new claims 202-215, the following restriction requirement was deemed necessary:

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 31,34,114,115,132-154,189-206,214,215, drawn to method producing of polymers of conjugates of monomeric and non-monomeric polypeptides.

Art Unit: 1631

II. Claim 207, drawn to method producing of polymers of conjugates of monomeric polypeptides and .

III. Claims 208,209, drawn to method producing of polymers of conjugates of monomeric polypeptides and nucleotides or derivatives thereof.

IV. Claim 210,211, drawn to method producing of polymers of conjugates of monomeric polypeptides and nucleic acids.

V. Claim 212, drawn to method producing of polymers of conjugates of monomeric polypeptides and oligosaccharides.

VI. Claim 213, drawn to method producing of polymers of conjugates of monomeric polypeptides and enzymes.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups. I-VI are patentably distinct from each other because of the materially different structures of the compounds that are subject to polymerization. The methods do not rely upon each other for their ultimate use and they require non-coextensive literature searches.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
